AP Series

Air-Powered Dock Leveler

25K - 50K
CIR

6' - 7'
WIDTH

6' - 10'
LENGTH

OPERATION

The Poweramp AP Series Leveler utilizes an air bag lifting mechanism with push-button activation to raise the leveler and automatically extend the lip. The standard lip is 16", with an operating range of 12" above and below dock level. The platform is designed to compensate for canted truck beds up to 4" and remain flush with the dock floor.

SAFETY FEATURES

- Dual-pivoting, cross-traffic legs for multi-position safety in the event of early departure
- Built-in lockout/tagout maintenance inspection strut
- Full-range toe guards close off sides at the highest position
- Lip keepers for cross-traffic support and automatic night lock security against theft

High volume, low pressure air blower to efficiently raise the leveler.

VEHICLE RESTRAINTS & ACCESSORIES

For enhanced safety, we recommend all Poweramp levelers be equipped with light communication, iDock Controls, and vehicle restraints, which help prevent unexpected trailer departure from the loading dock. Safety barriers are also available to prevent forklift trucks from driving over the dock edge.

CONSTRUCTION

The AP Series is designed with dependability and toughness in mind for medium to heavy-duty applications. All Poweramp levelers are built with a durable four-sided box construction. The use of structural steel C channels or I beams create substantially more deck support than other levelers.

CONNECTIVITY

Optional iDock® Controls with online connection to myQ® Enterprise.

AP SERIES COMMON OPTIONS

- 3-wheel offset forklift protection
- Custom interlocking
- Dock alert light communication system
- Dock lights
- Extended lip sizes (18" and 20")
- Foam insulated deck
- Integrated control panel
- Safety barrier lip
- Vehicle restraint
- Weather seal (brush or rubber)
