

## PR Series Hydraulic Dock Leveler

**30K - 120K**  
CIR

**6' - 7'**  
WIDTH

**6' - 12'**  
LENGTH

### FEATURES

- Automatic return to dock from all positions
- Deck-mounted pump, and motor
- Dual-control lanyard
- Fluid logic block
- Folding, and locking toe guards
- Internal tamperproof velocity fuse
- Low-pressure, hollow-ram hoist cylinder
- Maintenance inspection plate
- Push-button activation
- Quick-cycle, below-dock control
- Retractable lip cylinder
- Structural support members
- Below-dock end-loading capability
- CleanSweep frame design
- Four-sided box-construction deck assembly
- Lockout/tagout maintenance strut
- Night locks/cross traffic support
- Designed and manufactured in the USA

# PR Series Hydraulic Dock Leveler

30K - 120K  
CIR

6' - 7'  
WIDTH

6' - 12'  
LENGTH

## OPERATION

The Poweramp PR Series leveler utilizes a hydraulic operation with push-button activation to raise the leveler and automatically extend the lip. The standard lip is 16" (18" on higher capacities), with an operating range of 12" above and below dock level. The platform is designed to compensate for canted truck beds up to 4" and remain flush with the dock floor.

## SAFETY FEATURES

- Tamperproof, in-line velocity fuse that will lock the leveler in position (+/-3") if the truck pulls away while in use
- Fluid Logic Block controls the flow of hydraulic fluid
- Deck-mounted pump and motor with maintenance checkplate in deck
- Built-in lockout/tagout maintenance inspection strut
- Folding and locking toe guards close off sides even at the highest position
- Lip keepers for cross traffic support and automatic night lock security against theft

Maintenance inspection plate in the deck to allow for maintenance above the dock.

## VEHICLE RESTRAINTS & ACCESSORIES

For enhanced safety, we recommend all Poweramp levelers be equipped with light communication, iDock Controls, and vehicle restraints, which help prevent unexpected trailer departure from the loading dock. Safety barriers are also available to prevent forklift trucks from driving over the dock edge.

## CONSTRUCTION

The PR Series combines a structural steel ramp design with a proven hydraulic operation to produce a safe, reliable, yet economic hydraulic dock leveler. All Poweramp levelers are built with a durable, four-sided box construction. The use of structural steel C-channels or I-beams create substantially more deck support than other levelers.

The lifting cylinder is a unique, low-pressure, hollow-ram design with hard chrome plating for longer life. The double-sealed cylinders include rod wipers and are self bleeding. The 1.5 HP motor provides a smooth and quiet operation.

## CONNECTIVITY

Optional iDock® 2.0 Controls with online connection to myQ® Enterprise.

## PR-SERIES COMMON OPTIONS

3-wheel offset forklift protection

CentraPower

Custom interlocking

Dock alert light communication system

Dock lights

Emergency stop button

Extended lip sizes (18" and 20")

Foam insulated deck

Integrated control panel

Quick cycle lip extend (push button)

Safety barrier lip

Vehicle restraint

Vertical dock bumpers

Weather seal (brush or rubber)
